Aamir Mohammed Khan

DRAFT - pending Aamir's final public-content review.

AI Systems and Full-Stack Engineering

Portfolio | GitHub | LinkedIn | Email

Profile

Computer Science and Engineering undergraduate building full-stack and LLM-powered applications. Uses AI-assisted implementation, debugging, testing and code review while validating generated changes.

Education

B.Tech, Computer Science and Engineering, M. S. Ramaiah University of Applied Sciences, Bengaluru. Expected graduation: 2027. CGPA: 9.77/10.

Skills

Python, C, C++, JavaScript, TypeScript and SQL. React, Node.js, Express and FastAPI. LLM API integration, hybrid retrieval, tool calling, structured outputs and SSE. MongoDB, PostgreSQL, Redis and BullMQ. Docker, Linux, Git and GitHub Actions.

Experience

AlgoUniversity - Software Development Extern. Developed Entropy-OJ as an individual assignment with mentor guidance.

Selected projects

Entropy Online Judge: React/TypeScript coding workspace with Monaco Editor. Node.js/Express, Redis/BullMQ and MongoDB support asynchronous C++17/Python judging, resource limits and diagnostics. Integrated progressive AI hints, problem auditing and complexity classification.

Entropy-OJ source

AI Digital Assistant Portfolio: FastAPI/React recruiter assistant with BM25 and ONNX hybrid retrieval, cited streaming answers, validated tool calls and structured job-fit reports. Includes deterministic safety/capacity controls and offline retrieval/replay evaluation. Database, handoff and durable analytics are planned; factual-accuracy validation is not established.

Portfolio live

HealthTracker: Health and activity tracking PWA with interactive dashboards and CI/CD. Health Premium Predictor: Streamlit/XGBoost application with feature engineering and hyperparameter tuning. Performance metrics omitted pending final review.

Review provenance

Prepared from resume.tex, existing draft profile/project facts and implemented portfolio behavior. No phone number included. Dates, honours and unverified performance claims are intentionally omitted; this draft does not approve the underlying fact corpus.
